

Guide to Web Browser Cookies

Are cookies bad?

Just about all shopping carts require that cookies are enabled in your browser in order to allow you to place an order.

Cookies do not act maliciously on computer systems. They are merely text files that can be deleted at any time - they are not plug-ins nor are they programs. Cookies cannot be used to spread viruses and they cannot access your hard drive.

This does not mean that cookies are not relevant to a user's privacy and anonymity on the Internet. Cookies cannot read your hard drive to find out information about you; however, any personal information that you give to a Web site, will most likely be stored in a cookie. In only this way are cookies a threat to privacy. The cookie will only contain information that you freely provide to a Web site. Greenway Products uses Cookies to store the contents of your shopping cart on your computer. PayPal accesses the Cookies on your computer to fill the shopping cart and calculate amounts and quantities. You must have Cookies enabled for the PayPal shopping cart to function.

How to enable cookies

Web sites like Greenwayproducts.com and others require that cookies be enabled. To specify how your browser should handle cookies, follow the instructions below for your web browser version:

1. Select the Internet Options option from the View menu.
2. Click on the Advanced tab and scroll down to the Security option, and select Cookies.
3. Click on the appropriate radio button to enable cookies.
4. Click OK.

Windows Internet Explorer 5

1. On the Tools menu, select Internet Options.
2. Click on the Security tab, select Internet and then click on Custom Level...
3. Scroll down to the Cookies section and, under Allow cookies that are stored on your computer, click to select Enable.
4. Click OK and OK again.

Windows Internet Explorer 6

1. In Internet Explorer, on the Tools menu, click Internet Options.
2. Click the Privacy tab, and then click Advanced.
3. Move the slider up or down to select the level of security.
4. In addition to using the slider, you can override cookie handling clicking the Advanced Privacy Settings window and checking the box marked Override automatic cookie handling.

Guide to Web Browser Cookies

1. Open Internet Explorer.
2. Click the Edit menu and choose Preferences.
3. Expand the Receiving Files category by click the triangle to the left, and click Cookies
4. Select the item or cookies you want to delete in the Server list and click Delete.

Windows Netscape 4.x

Netscape bundles all web site cookies into one file. This file cannot be edited. If you wish to remove one cookie, you must remove them all by deleting the cookie file.

1. Locate the Netscape folder on your hard drive (usually located in c:/Program Files/Netscape/).
2. Double click the Users folder within the Netscape folder.
3. Double click your Profile Name folder (this will usually be your username).
4. Click the cookies.txt file once to highlight it, then click the File menu and choose Delete.

Macintosh Netscape 4.x

Netscape bundles all web site cookies into one file. This file cannot be edited. If you wish to remove one cookie, you must remove them all by deleting the cookie file.

1. Double click the Hard Drive icon and open the System Folder.
2. Double click Preferences and locate the Netscape Users folder.
3. Double click Your Profile folder.
4. Single click the MagicCookie file so that it is highlighted, click the File menu and choose Move to trash
5. Or, drag and the MagicCookie file to the Trash folder.

Guide to Web Browser Cookies

Netscape 7

1. Click the Tools menu and choose Cookie Manager
2. Choose Manage Stored Cookies from the submenu. The Cookie Manager window opens with a list of all the cookies stored on your computer.
3. Select one or more cookies and click Remove Cookie, or click Remove All Cookies.

Opera for Macintosh

1. Click on Window then Special Window and select Cookies.
2. You can click the cookie files listed in the folders. To delete a cookie, highlight the file you want to delete. Press the Shift key to select multiple files.
3. Click the Delete button.
4. The ones remaining will be saved.

Opera for Windows

Opera supports the exact same format for setting cookies as Internet Explorer and Netscape Navigator. This means that Opera will be able to accept all cookies that work with these browsers. Cookies are stored in the file named cookies4.dat located in the main Opera directory (usually C:\Program Files\Opera). It is not possible to edit the file cookies4.dat by hand in order to remove unwanted cookies from your hard drive, but you can download the Opera File Explorer and use this tool to view your cookies.

Mozilla

1. Click Tasks and select Privacy & Security then choose Cookie Manager.
2. On the submenu, choose View Stored Cookies. The Cookie Manager opens and lists the cookies stored on your computer.
3. Select one or more cookies and click Remove Cookie. Clicking Remove All Cookies will delete all cookies.
4. Optional: Choose to prevent removed cookies from being re-accepted later.
